

Edison Elementary is partnering with Health Partners of Western Ohio to support Vision/Dental health outreach programs for our students. This is a new partnership for the school and we will focus on priority students of need this year as we explore expanding services throughout the school and services in coming years.

The priority focus is set for our school initially who is participating in an Ohio Department of Health governor's initiative, the OhioSEE vision-specific grant for these upcoming two years, because our school is eligible for OhioSEE services. While we will be prioritizing students for these services with a focus on K-3 and need-based individuals this year, Edison Elementary strives to continue the partnership with Health Partners of Western Ohio for vision and dental services in the coming school year for expanded K-12 participation!

Please stay tuned for more communication and information next year as we expand services throughout our school for students.
